About

turning point

You probably would have guessed it by now, if there is one thing in the world that could excites us, it is coffee.

We are quite obsessed, actually. We are obsessed in sourcing beans from some of the best coffee growers, locally & around the world. Roast them to unlock its flavour potential & unique characteristics, brew it in ways that are respectful to the hard work of the people & communities that have gone before us.

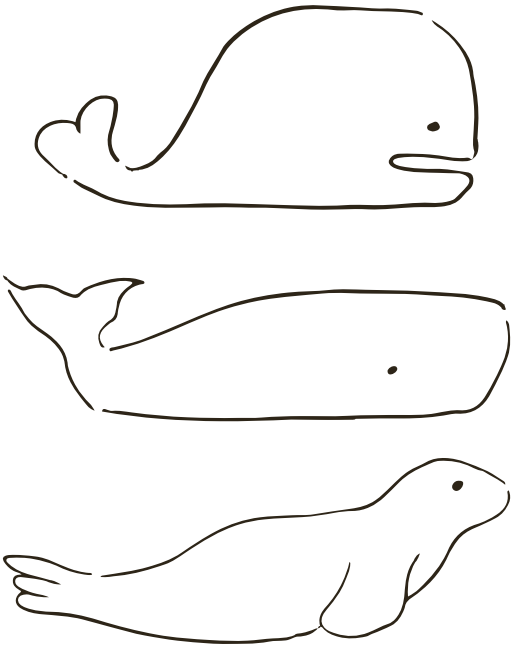

We believe that your cup of coffee means more than just a delicious drink or an eye pleasing art, it contains stories & values held dearly by different people & their communities.

Until recently, we continually ask ourselves, how can we share these stories in a better way with you? How can we elevate your Turning Point experience & serve you better?

Therefore, our next obsession is to provide you with a variety of honest & comforting home made food, prepared with the same amount of love & care from our own kitchen.

Allow us to take you into this new journey, & may your turning point experience be as exciting as ours.
